

PEOPLE AT WORK

Unit 1

8/29/2026

GROUPS & TEAMS

BWPM-SemV-2026-27

2

“Any number of people who interact with each other and perceive themselves to be a group”
(Schein, 1980)

GROUPS (Gordon, 2001)

- Members see themselves as a UNIT
- Group provides REWARDS for all
- CORRESPONDING effects
- Common GOALS

Why Join Groups

- Assignments (common)
- Physical proximity (colleagues living nearby)
- Affiliation (need)
- Identification (with some cause)
- Emotional Support
- Assistance or Help
- Common Interests
- Common Goals

Groups & Teams

- Groups are more generic in nature
- Teams are made mostly in organizational set up
- Group members work together or may share resources
- Team members work on tasks that are interdependent
- Both terms are largely used interchangeably

“A team is an interdependent collection of individuals who work together toward a common goal and who share responsibility for specific outcomes for their organizations.”

(Sundstorm, DeMuse & Futrell, 1990)

FACTORS AFFECTING GROUP PERFORMANCE

1. Group Cohesiveness

About liking and trusting

- Productivity and efficiency
- Decision quality
- Member satisfaction
- Member interaction
- Employee courtesy

Group Status

Group Size

Outside Pressure

Isolation

**Stability of
membership**

Homogeneity

2. Group Ability & Confidence

3. Personality of Members

4. Communication Structure

Three Common Formal Small-Group Networks

EXHIBIT 11-3

5. Group Roles

Task oriented

Social oriented

6. Presence of Others

Social Facilitation

Audience Effect

Coaction

Social Loafing

Free Rider

Sucker Effect

Facilitation vs. Loafing

7. Individual Dominance

8. Groupthink

Occurs when the group

- Is cohesive
- Is insulated from qualified outsiders
- Has an illusion of invulnerability and/or infallibility
- Believes that it is morally superior to its adversaries
- Is under great pressure to conform
- Has a leader who promotes a favourite solution
- Has gatekeepers who keep information from other group members

Can be reduced when the leader

- States his position strongly
- Promotes open discussion
- Creates subgroups to invite disagreements

8/29/2026

TEAMS

What is a Work Team?

“A collection of 3 or more individuals who interact intensively to provide an organizational product, plan, decision or service” (Devine, et al. 1999)

- Identification: with the team rather than the group
- Interdependence: depending on others' assistance, expertise, opinions
- Power differentiation: ensuring equality; apologize if overstepped a role, avoid challenging by asking indirect questions, be polite
- Social distance: reduced by being casual, using nicknames and expressing liking, empathy and common views
- Conflict management tactics: collaboration, understanding others' views, compromising, using nonthreatening tone
- Negotiation process: win-win style

Types

- Work teams
 - Members manage themselves, assign jobs, plan and schedule work, make work-related decisions, solve work-related problems
 - Employees cross trained
 - Responsible for their own productivity
- Parallel teams
 - Cross functional teams that have representatives from various departments
 - Essential to identify clear purpose, receive support and establish trust
- Project teams
 - Created to produce onetime outputs
 - Dismantled once the goal is accomplished
- Management teams
 - Coordinate, manage, advise and direct teams and employees
 - Responsible for providing general direction and assistance

Team/Group Formation

Tuckman & Jensen, 1977

Why teams don't always work?

- Excessive meeting requirements
 - Frequent meets- Time waste
 - Topics- diversions, stretching the meeting
- Lack of empowerment
 - Lack of authority
 - Managers worry of quality of work, and overstepping boundaries
 - Team members reject empowerment
- Lack of skill
 - Lack skill and/or expertise in problem solving
 - Team members who are bright, conscientious, extraverted and emotionally stable perform better
- Distrust of the team process
 - Managers unwilling to give authority (must be trained)
 - Lack of receptivity among team members- low job satisfaction and organizational commitment
 - Nature of work- should be suitable/appropriate for the team
- Unclear objectives
 - Why teams are formed
 - What is expected
 - When are they supposed to finish/dismantle

GROUP MEMBERSHIP/BEHAVIOUR

Social Identity Theory- Tajfel & Turner, 1979

Social Exchange Theory- Homans, 1961

		Benefit of helping / Cost of NOT helping	
		High	Low
Benefits of NOT helping / Cost of helping	High	Indirect intervention or reappraise the situation	Not help
	Low	Directly help	Depends on norms

Consequences of Groups

Functional Behaviour

Information Exchange
Diversity in Workforce
Composition of Groups

Dysfunctional Behaviour

Group Polarization
Groupthink

Group Conflict

Conflict- a psychological and behavioural reaction to a perception that another person is

- Keeping you from reaching a goal
- Taking away your right to behave in a particular way
- Violating the expectancies of relationship
- Types:
 - Individual vs. Individual
 - Individual vs. Team
 - Team vs. Team

Causes

- Competition of resources- more demand less supply
- Task Interdependence
- Jurisdictional Ambiguity
- Communication Barriers
 - Physical
 - Cultural
 - Psychological
- Beliefs
 - Superior to others
 - Mistreated by others
 - Vulnerable to others
 - Cannot trust others
 - Helpless and powerless
- Personality

Types

Brinkman & Kirschner
(2006)

High need
for Control

High need
for Attention

High need
for Approval

High need
for
Perfection

Difficult Types	Behavior Description	Strategy
Tanks	- Confrontational - Pointed and angry - Aggressive	- Hold your ground - Pattern interrupt - Aim for the bottom line
Snipers	- Biting sarcasm - Rude comments - Eye rolls	- Use questions: - Intent - Relevancy - Hold your ground - Clarify your expectations
Know-It-Alls	- Not like contradiction - Quick to blame others - Closed minded	- Know your facts - Short bursts of facts - Indirect presentation - Align expertise to solution
Think-They-Know-It-All	- Seen as an expert - Exaggerates - Over states	- Acknowledge positive intent - Clarify for specifics - Link to reality - Have compassion
Grenade Person	- Explodes with anger - Rants and raves	- Lower and slower – voice - Use hand gestures - Find root cause - Stay objective
Yes Person	- Forget commitments - Over commit	- Help with planning - Encourage realistic discussions - Remember the helpful intent
Maybe Person	- Decision procrastination - Wants more facts	- Reduce risk concerns - Develop a decision strategy - Better the enemy of good
Nothing Person	- Minimal engagement - Slow pace - May seem aloof	- Be patient... slow your pace - Use humor – keep it light - Ask about future challenges
No Person	- Fault finder - Problem finder - Sees what is missing	- Go with the flow... yes – and... - Early warning system - Make a polarity statement - Remember the helpful intent
Whiners	- Sees what is missing - Never good enough - Perfectionist	- Shift “not wants” to “wants” - Get a solution focus

Styles

Conflict Styles

HIGH

CONCERN FOR SELF

Competing or **Forcing**
(Win/Lose)
“My Way”

Collaborating
(Win/Win)
“Our Way”

Compromising
(Partial Lose/Lose)
“Half Way”

Negotiating/Bargaining

Withdrawal

Avoiding
(Lose/Lose)
“No Way”

Triangling

Accommodating
(Lose/Win)
“Your Way”

LOW

CONCERN FOR OTHERS

HIGH

Adapted from W. W. Wilmot & J. L. Hocker (2010). *Interpersonal Conflict*, 8th ed.
New York: McGraw-Hill.

Resolving Conflict

- Formal Policy at Organizations
- Conflict resolution skills
 - Conflict resolution skills (cooperation, compliments, no negative interaction, mutual similarities, common goals)
 - Reduce tension- Increase trust
 - Planned meeting-
 - Dispute
 - Cooperative Problem Solving
- Third-Party Intervention
 - Mediation- reach a mutual agreement
 - Arbitration- choose the correct side

8/29/2026

LEADERSHIP

“A process of creating vision for others and having the power to translate this vision into a reality and then to sustain it”

Kotter, 1988

Leader Characteristics & Performance

- Traits
 - Extraversion, openness, agreeableness and conscientiousness (Judge, et al., 2002)
 - Management, decision making, and oral communication (Youngjohn & Woehr, 2001)
 - Self Monitoring
- Cognitive ability
 - Useful when leader isn't distracted by stress
 - When leader has a directive style
 - Synthesis of wisdom, intelligence (academic & practical) and creativity (Sternberg 2007)

- Needs
 - nAch, nPow & nAff
 - Leadership motive pattern: nPow ↑ nAff ↓
- Gender
 - Men effective in traditionally masculine situations-subordinates are men and vice versa
 - Women more likely to engage in high quality leadership behaviour (Eagly, Johannesen-Schmidt & van Engen, 2003)

Task Vs. Person Oriented

- Ohio Studies (1950s): behaviours indicating high or low
 - Consideration – mutual trust, respect and certain warmth & rapport
 - Initiating Structure- leader organizes and defines group activities and his relations with the group
- Theory X & Y (McGregor, 1960s): leaders are
 - X- authoritarian
 - Y- liberating
- Managerial Grid (Blake & Mouton, 1984): high or low concern for
 - people
 - results

Ohio State Leadership Studies

Dimensions of Leader Behavior

Leader and the Situation

- Fieldler's Contingency Model (1960s)
 - Leadership effectiveness depends on interaction between leader and situation
 - No one particular leadership style
 - Least Preferred Coworker & LPC Scale
 - Situation Favourability depends on
 - Task structuredness
 - Leader position power
 - Leader member relation
 - Not much research evidence

Fiedler's Contingency Theory

Leader & Subordinate Ability

Path-Goal Theory by House

Subordinate Ability

Hersey & Blanchard's Situational Theory

Suitable styles for types of Subordinates:

S1: Unable and unwilling or insecure

S2: Unable but willing or confident

S3: Able but unwilling or insecure

S4: Able but willing or confident

Relationship with Subordinate

Leader-Member Exchange (LMX)- Dansereau, Graen, & Haga (1975)

Leader-Member Exchange Theory

8/29/2026

SPECIFIC LEADERSHIP SKILLS

A red pawn stands on the left, and a group of yellow pawns stands on the right, all on a wooden surface. The pawns are in the foreground, and the background is a dark, blurred gradient.

Leadership through Decision Making

- Vroom & Yetton (1973)
- Decisions by leaders are best only in specific situation; mostly decisions are good when made by participation by others- subordinates, colleagues, or both
- Leadership performance can be improved by training leaders in decision making
- Decision tree- helps decide whether decisions should be made alone or with others
- Decision Styles
 - Autocratic
 - Consultative
 - Group

Normative Decision Model

Decision Style ^a	Definition
AI	Leader makes the decision alone
AII	Leader asks for information from team members but makes the decision alone. Team members may or may not be informed what the situation is.
CI	Leader shares situation with each team member and asks for information and evaluation. Team members do not meet as a team, and the leader alone makes the decision.
CII	Leader and team members meet as a team to discuss the situation, but the leader makes the decision.
G	Leader and team members meet as a team to discuss the situation, and the team makes the decision.

^aA = autocratic C = consultative G = group

Sources: V. H. Vroom and P. W. Yetton, *Leadership and Decision-Making* (Pittsburgh, PA: University of Pittsburgh Press, 1973); V. H. Vroom and A. G. Jago, *The New Leadership: Managing Participation in Organizations* (Englewood Cliffs, NJ: Prentice Hall, 1988).

Adapted from Exhibit 11.6: Normative Decision-Making Model: Decision-Making Styles

Leadership through Decision Making

Leadership through Power

Sources of Power Used by Leaders

Power of the POSITION:

Based on things managers can offer to others.

Rewards

- “If you do what I ask, I’ll give you a reward.”

Coercion

- “If you don’t do what I ask, I’ll punish you.”

Legitimacy

- “Because I am the boss, you must do as I ask.”

Power of the PERSON:

Based on how managers are viewed by others.

Expertise

- As a source of special knowledge and information.

Reference

- As a person with whom others like to identify.

Leadership through Vision

Transactional Leadership Burns (1978)

- Leader focus on task-oriented behaviours
- Setting goals, monitoring performance, providing a consequence to success or failure
- 3 dimensions
 - **Contingent reward** (reward for doing desired activity)
 - **Management by exception-active** (actively monitor performance and take corrective actions)
 - **Management by exception-passive** (do not monitor actively and take corrective action only when problems are serious)

Transformational Leadership Burns (1978)

- Visionary leadership where leader changes the nature and goals of organization
- Visionary, charismatic, inspirational
- Confident, need to influence others, strong belief about correctness of their beliefs and ideas
- 3 Dimensions
 - Charisma
 - Intellectual stimulation
 - Individual consideration

TRANSFORMATIONAL LEADERSHIP

Idealized Influence + Inspirational Motivation + Intellectual Stimulation + Individualized Consideration

TRANSACTIONAL LEADERSHIP

Contingent
Reward
+
Management-
by-Exception

Expected
Outcomes

**Performance
Beyond
Expectations**

Charismatic Leadership

- Strong need for power
- Supremely confident
- Engage in behaviours designed to impress (self-praise)
- Articulate appealing vision
- Set an example through own behaviour
- Set high goals and express confidence in followers to achieve those goals
- Attempt to appeal fundamental motives (power, affiliation, achievement)
- Speak and write inspiringly
